

## INDUSTRIAL PVC STRIP CURTAIN

CLEAR BLUE PVC STRIP CURTAIN

Clear visibility ensures safe movement and allows natural light to pass through, making these strip curtains ideal for areas with frequent human or vehicle traffic.

The subtle blue tint enhances cleanliness and is UVC stabilized, making them perfect for industrial, commercial, and food processing spaces. Durable, flexible, and low-maintenance, they are suitable for clean rooms, warehouses, kitchens, and retail entrances - ensuring hygiene without compromising accessibility.

ANTI INSECTS PVC STRIP CURTAIN

Anti-insect PVC strip curtains are specially designed to repel insects by filtering out UV light, which attracts pests. Ideal for food processing units, kitchens, warehouses, and retail areas, these curtains help maintain hygiene and prevent contamination. The vibrant yellow color acts as a visual barrier while allowing light transmission and visibility. Durable, flexible, and easy to clean, they also help control dust, airflow, and temperature - making them a reliable solution for pest control and environmental separation.

Model	Strip Width	Thickness	Roll Size
Clear Blue	200mm & 300mm	2 mm - 5mm	50mtr
Anti Insects	200mm & 300mm	2 mm & 3mm	50mtr
